

WOODWORKS WOOD DESIGN AWARDS

2014 Sponsorship Opportunities

Connect your company or product with innovative wood design in the minds of thousands of architects and engineers.

Each year, WoodWorks hosts an award program to recognize excellence in wood design and showcase innovative buildings that demonstrate benefits of wood such as strength, beauty, versatility and cost effectiveness. This year, we will again present one national award program, and we're offering an exclusive sponsorship opportunity in each of the eight award categories.

The Wood Design Awards will be presented at all six Wood Solutions Fairs held across the country during 2014, beginning with the Southeast Fair on January 29, and the Southern California Fair on February 26. Wood Solutions Fairs are attended by an average of 200-400, sometimes up to 650, design professionals, for a potential audience of between 2,000 and 3,000 attendees.

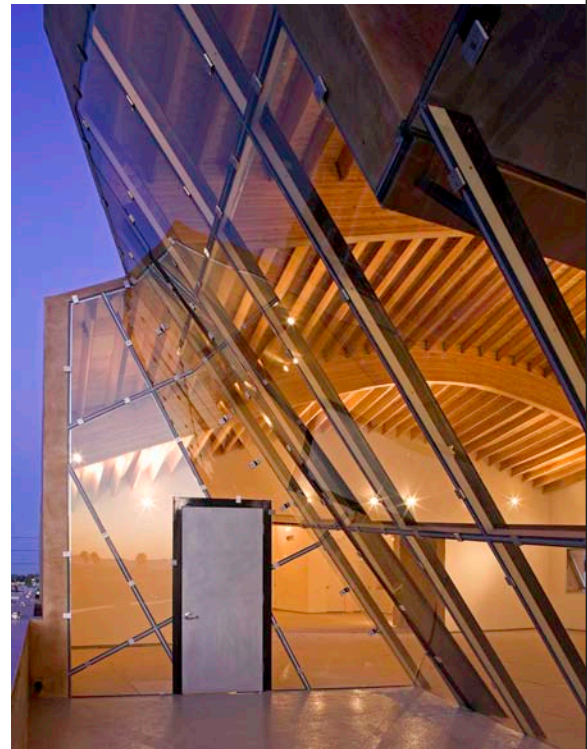

Sponsor benefits include:

- Recognition in the on-site programs given to attendees at all six Wood Solutions Fairs
- Recognition as the exclusive sponsor of your award category when the award is presented at each Wood Solutions Fair
- Recognition of your company in the award video, which will be part of the award presentation at all six Fairs and featured on the WoodWorks website
- Logo on the award poster for the sponsored category, which is displayed at the award luncheons
- Logo displayed on the WoodWorks website and linked to your website
- Recognition as the exclusive sponsor in your award category in the hardcover North American Wood Design Awards book

Cost: \$2,500 per sponsorship

WoodWorks is an initiative of the Wood Products Council, a cooperative venture of major North American wood associations.

Award Categories

- Commercial Wood Design
- Institutional Wood Design
- Beauty of Wood
- Green Building with Wood
- Traditional Use of Wood
