

Honors Academy

Honors Academy is a 100 year old private High School that prides itself on being a progressive learning center. The board of Directors have recently acquired land adjacent to the current facility. It has been decided that since the existing building holds no historic value that a new facility will be built on the purchased land and the present structure will be torn down and replaced with a state-of-the-art football/ soccer/ track field and grandstands.

Presently there are approximately 900 students attending the academy. The goal for the new school is to grow the student body to 1200 youth. The expectation is that the curriculum will focus on the standards of STEM education but will also include a robust fine arts program.

New School Needs

STUDENT CLASSROOM NEEDS

Standard Classrooms (24)	900 sf
Biology Classroom/ Lab (1)	1400 sf
Chemistry Classroom/ Lab (1)	1400 sf
